

Undercounter Dishmachines

Wash wares anywhere.

Why Jackson Undercounters?

In short, they offer more standard features than any other brand. Other manufacturers often accompany their machines with a long list of “optional” features that are actually necessary for optimal performance. Jackson undercounters are fully operational with all the features you need for optimum cleaning—including a Fill and Dump feature that dumps the dirty water with every cycle, replacing it with clean water. This reduces overall detergent use and makes chemical costs more predictable than competitors’ units. And with their competitive price, they’re one of the best warewashing values you can buy.

Features and Benefits

Avenger® HT

High-temp performance without a high price tag.

Resource Efficient

- Uses only 1.1 gallons of water per rack and cleans 24 racks per hour
- Shared heating system for wash and rinse tank means fewer parts to service and increased energy efficiency

Exceptional Performance

- Built-in stainless steel booster with Sani-Sure™ technology ensures safety by keeping the machine from going into the final rinse cycle until proper sanitation temperature is achieved
- Air-insulated between the machine’s body and stainless steel housing to keep external surfaces cool and reduce noise level
- Self-draining stainless steel pump eliminates soil/detergent carryover between wash and rinse cycles
- Fresh, heated final rinse water is held and used for the next wash cycle
- Labyrinth door seal eliminates the need for a gasket
- Pressure regulating valve comes standard, ensuring proper incoming water pressure for optimal performance and results
- Above-water scrap basket reduces the amount of recirculated food soil, resulting in cleaner wares and reduced chemical usage
- Built-in detergent and rinse pump assures proper chemical usage and saves space

Easy to Install, Operate, and Maintain

- Pumped drain makes for easy installation, providing you the flexibility to connect the machine to a wall or floor drain
- Push-button instant start makes start-up easy and safe

Available in two high-performance models, each Jackson undercounter includes a variety of distinctive features and benefits that conserve resources, enhance performance, and make your dishmachine easy to operate, clean, and maintain.

Jackson Undercounter Dishmachines are ideal wherever space is at a premium. Offering a compact approach to fast, reliable results, Jackson Undercounters offer superior cleaning performance.

Avenger® LT
Less expense, more clean.

Resource Efficient

- ENERGY STAR® qualified
- Uses only 1.2 gallons of water per rack and cleans 24 racks per hour
- Chemical sanitizer reduces demand for hot water, saving on utility bills and reducing operating costs

Exceptional Performance

- Chlorinated sanitizing agent ensures optimum sanitation and serves as an excellent stain remover
- Air-insulated between the machine's body and stainless steel housing to keep external surfaces cool and reduce noise level
- Self-draining stainless steel pump eliminates soil/detergent carryover between wash and rinse cycles
- Built-in low product indicator light alerts the user whenever the machine runs out of chemical products
- Labyrinth door seal eliminates the need for a gasket
- Above-water scrap basket reduces the amount of re-circulated food soil, resulting in cleaner wares and reduced chemical usage
- Built-in chemical pumps assure proper chemical usage and save space

Easy to Install, Operate, and Maintain

- Pumped drain makes for easy installation, providing you the flexibility to connect the machine to a wall or floor drain
- Push-button instant start makes start-up easy and safe

Easily accommodates varying sizes

Durable stainless steel buttons

Labyrinth door seal eliminates the need for a gasket

Complimentary Performance & Installation Check

From the very beginning, Jackson is there to ensure your equipment is working to its full potential. At the time of installation, our Jackson Authorized Service Agent (ASA) will run the machine to verify that all electrical, water, and drain hookups are correct, the machine turns on and off, there are no leaks, and the pumps are rotating in the proper direction. If the installation is performed by anyone other than a Jackson ASA, we recommend that the customer contact Jackson Technical Service to schedule our Performance and Installation Check. After the installation is powered and plumbed, this complimentary Jackson service verifies the installation; checks and adjusts temps, cycle times, and parts; and evaluates all the operation/performance capabilities of the unit.

About Jackson

Jackson WWS is a full-line supplier of high-quality commercial dishmachines including flights, conveyors, door-types, glasswashers and undercounters. Founded in 1925, Jackson stands by their "Clean the First Time®" commitment with dishmachines that deliver optimal cleaning performance while reducing labor, chemical and utility costs. With more standard features, lower operating and acquisition costs and our network of factory-certified technicians, Jackson sets the standard for warewashing. For more information about Jackson and its full line of warewashing solutions, please visit www.jacksonwws.com or call 1.888.800.5672.
